Watt Stopper/Legrand's Miro lighting controls help restaurants set the scene for dining

SANTA CLARA, CA August 2007 - Watt Stopper/Legrand's innovative Miro lighting controls provide restaurant owners and operators with the simplicity and reliability of one-touch operation. Miro dimmers and scene controllers offer effortless recall of preset lighting levels for different areas, functions and times of day. Consistent lighting levels, smooth fades and elegantly styled devices contribute to dining ambiance and customer satisfaction.

Miro eliminates the jerky fades and random light levels that can distract diners. Now available in two styles – architectural and decorator – Miro complements any decor. Remote controls reduce wall clutter and handheld remotes put lighting control anywhere it's needed. A maitre d' could adjust lighting from a podium.

Miro's unique universal dimmers operate most dimmable loads including incandescent, magnetic or electronic low voltage, neon/cold cathode and fluorescent lighting, simplifying project specification. Miro is completely scalable, requires no central processor, and can be easily reconfigured or expanded to adapt to a facility's changing needs – protecting the owner's investment. Over 1000 devices can be included in a system, an industry high. Easy-to-install Miro is a cost-effective solution for retrofits and new construction. Fast and reliable 900MHz RF communication between devices eliminates the need for control wiring, and Miro boasts a superior radio range. A full product selection that includes high wattage dimmers, lamp and appliance modules, touchscreens and timeclocks allows designers to extend Miro control throughout a space, customize fade times and automate control.

Watt Stopper/Legrand is a leading manufacturer of energy efficient lighting controls for commercial and residential use. We help customers find convenient ways to save energy, meet green initiatives, and comply with energy codes with our comprehensive range of products, programs, and services. Legrand, located in Limoges, France, is the world specialist in products and systems for electrical installations and information networks. Visit www.wattstopper.com.
