Watt Stopper/Legrand launches easy-to-use e-Book catalog

SANTA CLARA, CA July 2007 – To meet the ever-growing demand for online information, Watt Stopper/Legrand has created an e-Book encompassing its 2007/2008 Product Selection Guide. The convenient e-Book format gives customers quick and easy access to comprehensive information about energy-saving lighting controls. Specifiers, contractors and others are encouraged to tap this new resource for design and application guidelines as well as data on Watt Stopper/Legrand's full line of products including occupancy sensors, lighting control panels, daylighting controls and more.

The e-Book provides faster access to a large volume of information than alternative formats like web pages or downloadable PDF files. Navigation is simple and each catalog section can be immediately accessed by clicking a labeled tab. Links are provided from each section's table of contents to specific pages, but pages can also be turned just as they would using a printed book. The e-Book is searchable, and customization options include the ability to create bookmarks and sticky notes. Selected pages of the e-Book may be printed and will appear as standard catalog pages rather than looking like a browser window. Readers wishing to share information can send colleagues a link to the whole publication or to a specific page within the e-Book. Users who prefer to work offline may download the document.

Watt Stopper/Legrand's Product Selection Guide, which is also available in traditional printed form, is loaded with valuable information to help facilitate the most successful lighting control solutions. In addition to application guidance, the PSG includes advice about product installation and setup as well as wiring diagrams, schematics, etc. The service and resource section describes Watt Stopper/LeGrand's extensive design services and educational programs including seminars and publications on designing with lighting controls, energy codes and green building programs. To view or download the PSG e-Book, please visit www.wattstopper.com.

Watt Stopper/Legrand is a leading manufacturer of energy efficient lighting controls for commercial and residential use. We help customers find convenient ways to save energy, meet green initiatives, and comply with energy codes with our comprehensive range of products, programs, and services. Legrand, located in Limoges, France, is the world specialist in products and systems for electrical installations and information networks. Visit www.wattstopper.com.
